

Enable Search Capabilities

Explanation	Screenshot
<p></p> <p>This exercise will update the Data Definition to enable search capabilities in the Sustainable Grocery App.</p> <p>To learn more about how to enable search capabilities, follow this interactive tutorial.</p>	
<p>1. Choose Core Data Services > Data Definitions.</p>	
<p>2. Choose ZC_01_GROCERY with the double-click.</p>	

Explanation	Screenshot
<p>3. To replace the code in the data definition file, choose <i>Copy To Clipboard</i>.</p>	 <p>The screenshot shows the Eclipse IDE with the 'Data Definition ZC_01_GROCE' file open. A code snippet is displayed in the editor, and a blue button labeled 'Copy To Clipboard' with a circular arrow icon is highlighted. A yellow circle with the number '3' points to this button. The background shows the Project Explorer and Outline views.</p>
<p>4. Choose <i>Edit > Select All</i>.</p>	 <p>The screenshot shows the Eclipse IDE with the 'Data Definition ZC_01_GROCE' file open. The 'Edit' menu is open, and the 'Select All' option is highlighted. A yellow circle with the number '4' points to this option. The background shows the Project Explorer and Outline views.</p>
<p>5. Choose <i>Edit > Delete</i>.</p>	 <p>The screenshot shows the Eclipse IDE with the 'Data Definition ZC_01_GROCE' file open. The 'Edit' menu is open, and the 'Delete' option is highlighted. A yellow circle with the number '5' points to this option. The background shows the Project Explorer and Outline views.</p>

Explanation	Screenshot
