

## How to Create an ABAP Instance and Service Key

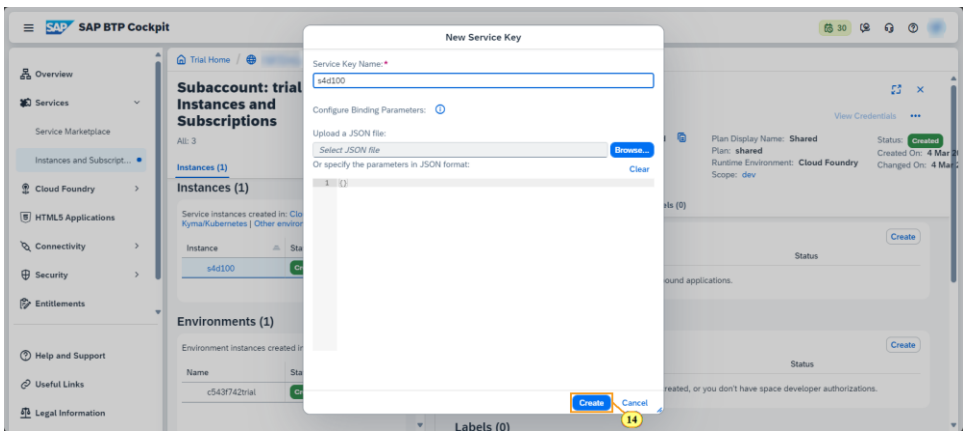

Explanation	Screenshot
<p></p> <p>In this demonstration we will setup your ABAP Cloud Environment and create a Service Key to connect to it from Eclipse.</p> <p>To learn more about how to create ABAP instance and generate service key, follow this tutorial.</p>	
<p>1. Choose <i>Go To Your Trial Account</i>.</p>	
<p>2. Choose <i>trial</i>.</p>	

Explanation	Screenshot
3. Choose <i>Services &gt; Instances and Subscriptions</i> .	 The screenshot shows the SAP BTP Cockpit interface. On the left sidebar, under the 'Services' section, the 'Instances and Subscriptions' option is highlighted with an orange box and a yellow circle with the number 3. The main area displays the 'Subaccount: trial - Overview' page, which includes details about the subaccount, its environment, and a 'Create Space' button.
4. Choose <i>Create</i> .	 The screenshot shows the 'Subaccount: trial - Instances and Subscriptions' page. In the top right corner, there is a 'Create' button highlighted with an orange box and a yellow circle with the number 4. The page also shows a table of subscriptions and a section for instances.
5. Open the <i>Service</i> list.	 The screenshot shows the 'New Instance or Subscription' dialog box. The 'Basic Info' tab is selected, and the 'Service' dropdown menu is open, showing a list of services. The 'Service' dropdown is highlighted with an orange box and a yellow circle with the number 5. The dialog box also includes fields for 'Plan' and 'Runtime Environment'.
